## Product safety information

	Please read these simple guidelines. Not following them may be dangerous or illegal
	Switch off the phone in the vicinity of chemical plants, gas stations and other locations containing explosive objects.
	Keep the phone far away from children.
	When driving, please use the hands free calling device (purchased separately) to ensure safety. Please park the car at roadside for communication unless in emergency.
	Switch off the phone when boarding an airplane and do not switch the phone on during the flight.
	Be careful when using the mobile phone in the vicinity of such devices as pacemakers, hearing aids and other electro-medical equipment, which may be interfered by the mobile phone.
	No guarantee for the accessories and parts not produced by the original factory.
	Never attempt to disassemble the phone by yourself. Contact the supplier in case of any trouble with your mobile phone.
	Do not recharge the phone without battery being installed.
	Charge the phone in well-ventilated environment and keep away from inflammable and high explosive articles.
	To avoid demagnetization, keep the handset away from magnetic substances, such as magnetic discs or credit cards.
	Keep the phone away from liquid. If soaking or erosion occurs, take the battery out and contact the supplier.
	Avoid using the phone in too high or too low temperature environments. Never leave the phone exposed under direct sunlight, in high humidity or in a dusty environment.
	Do not use liquid or a damp cloth with strong detergents to clean the handset.

## Battery

---

The lithium battery of the mobile phone can be immediately used after unpacking. A new battery performs best after performing a full charge/discharge 3 times.

### Installing the battery

1. Insert the battery by aligning the gold contacts in the battery compartment on the phone.
2. Push down on the upper section of the battery until it

clicks into place.

Pull down the battery

press the cover

### **Removing the battery**

1. Ensure that your mobile phone is switched off.
2. Remove the battery cover.
3. Pull the battery up and remove it from the mobile phone.

## **How to insert the SIM card**

---

If you want a mobile Phone that is sophisticated and easy to use and here it's in your hands! Naturally you are eager to star using it, but first you need to insert the SIM card.

### **Insert the SIM card as follows:**

- Ensure that the phone is switched off and charger is disconnected from the phone.
- Turn the phone over and remove the back cover.
- If the battery is already inside, remove it!
- Hold your SIM card with the cut corner oriented as shown and then slide it into the card holder face down.
- Replace the battery first.

- Replace the back cover.

### **What is a SIM card?**

Every mobile phone has a SIM card (Subscriber Identity Module). This is a micro-chip that holds your personal information such as names and phone numbers. Your phone won't work without it. If you already have contacts on your SIM card, they can be transferred in most cases.

### **How to charge the battery**

---

Your phone is powered by a rechargeable battery.

- Connect your travel adapter to the bottom of your mobile phone or the back of the charger that it has laid the mobile phone.
- Connect the other end of the travel adapter to the mains socket.
- If you are charging the battery when the mobile phone is switched off, the display will show a large battery icon with the bars moving from up and down. If charging the battery when the mobile is switched on, the display will show a

smaller icon.

- When the battery is fully charge, disconnect the charger.

**Note:** Please ensure the battery be charged for 12 hours or more before its first use.

## Power on/off

---

Ensure that you SIM card is in your mobile phone and that the battery is charged.

Please hold END key to Power on/off the phone. The phone will automatically search for the network.

Waiting time: about 200~300hours\*

Talk time: about 3~5 hours\*

\*Variation in operation times may occur depending on SIM card, network, and usage settings, usage style and environments.

## Care and Maintenance

---

### Battery and Charger Safety

- Only use batteries approved by the phone manufacturer.
- Your device is powered by a rechargeable battery. The full performance of a new battery is achieved only after two or three complete charge and discharge cycles.
- The charging time depends on the charger and the battery used.
- The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, replace the battery.
- If unused, a fully charged battery will lose its charge.
- When the charger is not disconnecting it from the power source. Do not leave the battery connected to the charger and power source for longer than necessary as overcharging it will shorten its life.

- Leaving the battery in hot or cold place, such as in a closed car in summer or winter conditions, will reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily, even when the battery is fully charged. Battery performance is particularly limited in temperatures well below freezing.
- Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object causes a direct connection between the + and – terminals of the battery. Short-circuiting the terminals may damage the battery or the connecting object.
- Do not dispose of the battery in a fire.

## **Phone Maintenance**

Your device is a product of superior design and chairmanship and should be treated with care. The suggestions below will help you protect your warranty coverage.

Keep the phone and all the parts and accessories (for example, SIM card) out of the reach of small children.

Do not use or store the phone in dusty or dirty locations. Its moving parts and electronic components can be damaged.

Do not use or store the phone in excessively hot places. High temperatures will shorten the life-span of the phone, damage the battery, and warp or melt the plastic used in the phone's manufacture.

Do not store the phone in excessively cold places. When the phone returns to its normal temperature, moisture can form inside the phone, causing damage to the electronic circuits.

Do not mishandle or abuse the phone. Dropping, knocking or shaking it can damage the internal circuits.

Do not use harsh chemicals, strong detergents, or cleaning solvents to clean the phone. If you must clean it, then use a soft, clean and dry cloth.

Do not paint the phone. Paint can clog the moving parts and prevent proper operation.

Use only the supplied or an approved replacement antenna.

Unauthorized antennas, modifications, or attachments could damage the device and may violate regulations governing radio devices.

If the phone or any of the accessories are not working as they should, please consult your dealer who can provide you with the expert assistance required.

All of the above suggestions apply equally to your device, battery, charger, or any enhancement. If any device is not working properly, take it to the nearest authorized service facility for service.

## FAQ

---

If your phone appears the questions frequently, please refer to the answers as follows. After that, you cannot solve the questions, please contact with the mobile phone dealers or service provider.
